Summary

Generative AI Engineer with 3+ years of experience building production-grade LLM applications, RAG pipelines, and agentic AI solutions using Python, FastAPI, Azure and AWS. Experienced in enterprise GenAI systems, intelligent retrieval, LLM evaluation, multi-agent workflows, and scalable AI application development.

Skills

Languages: Python, SQL
Technologies & Tools: LLMs, RAG, Agentic AI, Multi-Agent Workflows, Prompt Engineering, LangChain, LangGraph, FastAPI, Rest APIs, SQLAlchemy, Azure AI Search, Vector Search, Hybrid Retrieval, Embeddings, pgvector, PostgresSql, Amazon Bedrock, Titan Embeddings, Azure OpenAI, AWS Lambda, S3, CloudFront, Secrets Manager, AWS CDK, Azure DevOps, Docker, GIT, LLM Evaluation, Guardrails, Hallucination Control, Prompt Optimization, Output Validation, RBAC

Work Experience

Accenture, Mumbai Jun 2026 - Present
Advanced App. Engineer

- Implemented an **end-to-end GenAI-powered use-case recommendation solution** using **RAG, Amazon Bedrock, Titan Embeddings, PostgreSQL/pgvector, FastAPI and AWS Lambda**, with structured LLM outputs and deterministic fallbacks.
- Designed and implemented **enterprise RBAC** using **Amazon Cognito JWT authentication**, role-based read/write permissions, hierarchical data scoping, access-request approvals and backend authorization controls.
- Developed the solution using **SQLAlchemy, RDS Proxy, S3, CloudFront, Secrets Manager, IAM and AWS CDK**, with **Azure DevOps CI/CD** for deployment and delivery.

Capgemini, Mumbai Jan 2023 – May 2026
Senior Software Engineer

- Built and productionized an **agentic RAG system** using **Azure AI Search** for intelligent document retrieval, task planning and enhanced decision-making.
- Implemented **prompt engineering, hallucination control and output validation** mechanisms to improve response accuracy and reliability.
- Developed an **AI-driven test case generation platform** using **FastAPI and Llama-based GenAI**, incorporating prompt tuning and evaluation frameworks to improve output quality and consistency.
- Designed **BNG scoring logic** using satellite and environmental datasets and developed an **agentic AI system leveraging GBIF species and vegetation data** to generate region-specific ecological insights and restoration recommendations.
- Automated **SAP workflows**, reducing manual effort by approximately **60%**.
- Developed a **RAG-based virtual assistant** using **Flask and Azure Search**.

Education

Vidyalankar Institute of Technology, Mumbai Aug 2018 – Jun 2022
B.E. in Electronics **CGPA: 8.57/10**

Awards and Certificates

Azure AI Fundamentals (AI-900)
Azure AI Associate (AI-102)
Innovation Award
Rockstar Award
